PROFESSIONAL SUMMARY

Founding engineer with 4+ years building scalable, multi-tenant web applications end-to-end (database to UI) using **TypeScript, React/Next.js, Python/FastAPI**, and **PostgreSQL**. Shipped AI, real-time, and growth features across **88 tenants** and **38,000+ users** on **GCP**.

TECHNICAL SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript, Python, React, Next.js, FastAPI, SQLAlchemy, Node.js
- **Cloud & DevOps:** GCP (Cloud Run, Pub/Sub), AWS (EC2, ElastiCache), Docker, Kubernetes, GitHub Actions.
- **Tools:** PostgreSQL, Redis, PostHog, Prometheus, React Query, Tailwind CSS, Firebase.

EXPERIENCE

Decoda Health (YC W23)

Jul 2025 - Present

Founding Engineer, Product | Next.js, FastAPI, PostgreSQL, React Query, GCP

Toronto, ON

- Engineered a crash-resistant **medical AI scribe** with IndexedDB persistence and exponential backoff, used across **104K+ sessions** and generating **81K+ AI notes**, saving medical professionals **13,000+ hours**.
- Rewrote our **online booking**, scaling it **2x** to **2,500 bookings/month** across **29 clinics** and for **179K+ patients**.
- Built an end-to-end **email platform** with a reusable WYSIWYG composer, delivery and engagement tracking, enabling **email marketing campaigns** reaching **32K+ recipients** across **12 campaigns** and sending **94K+ emails**.
- Designed the **drag-and-drop scheduling builder** powering **49 clinics** to create **700K+ complex, multi-service appointments** with equipment booking, clean-up and prep time logic
- Built the company's first **observability stack** ingesting **37.8M events** via PostHog with a **118-event taxonomy**.
- Architected a **typed, cross-store internal product adoption platform** unifying **Postgres** and **PostHog** behind a **FastAPI** query registry, exposing **142 metrics** across **18 product modules** as the foundation for customer-health scoring and net-revenue-retention tracking.
- Drove company-wide adoption of **React Query**, establishing patterns for cache invalidation, optimistic updates, and mutation handling resulting in instant page loads while eliminating stale data bugs via stale-while-revalidate caching.

LearningModeAI

Jan 2025 - Jul 2025

Founding Engineer | JavaScript, Go, ElastiCache, EC2

Remote

- Developed a custom **Webpack** configuration to build a hybrid **JavaScript/React Chrome extension**.
- Built high-performance AWS microservices with **Go**, **ElastiCache**, and **EC2** for an asynchronous learning platform.
- Mentored 6 junior developers on **TypeScript** and **React** through code reviews and pair programming.
- Introduced **Agile** and **Lean** best practices, improving feature delivery and system stability.

ecobee

Jan 2024 - Aug 2024

Software Engineer | Go, Next.js, Kubernetes, GCP

Toronto, ON

- Developed frontend screens for coupon code activation using **Next.js** with **Amplitude** analytics. Configured private networks on **GCP**, reducing staging costs by 20%.
- Led a sprint as **SCRUM Lead** across 8+ teams, introducing rituals that cut incomplete Jira epics by 40%.

Royal Bank of Canada (RBC)

May 2023 - Aug 2023

Cyber Security Applications Developer | Vue.js, Django, Tailwind CSS, Figma

Toronto, ON

- Built 8+ responsive components with **Vue.js** and **Tailwind CSS**. Created a **Mock API** with **Django** and **Faker** for end-to-end testing of data pipelines.

System1

Sep 2022 - Dec 2022

Full Stack Web Developer | Angular, Snowflake SQL, Python Flask

Guelph, ON

- Enhanced advertising dashboard frontend with **Angular**, implementing dynamic data visualizations, UI redesigns, and optimized Snowflake SQL queries.

EDUCATION

University of Guelph

September 2020 - April 2025

Bachelor of Computing, Software Engineering (Co-op) | GPA: 3.7/4.0

Guelph, ON

- Minor in Project Management.
